The Evolution of the Tea Bag

One Cup. That's all it takes to completely transform your perception of what a tea bag should be. We've spent years traveling the world, seeking the richest tea varieties, working with the very top growers, fine tuning our best blends, and designing a special knit tea bag that won't hinder the flavor and aroma of our premium teas. Try one cup, and you'll never think of a tea bag in the same way again.

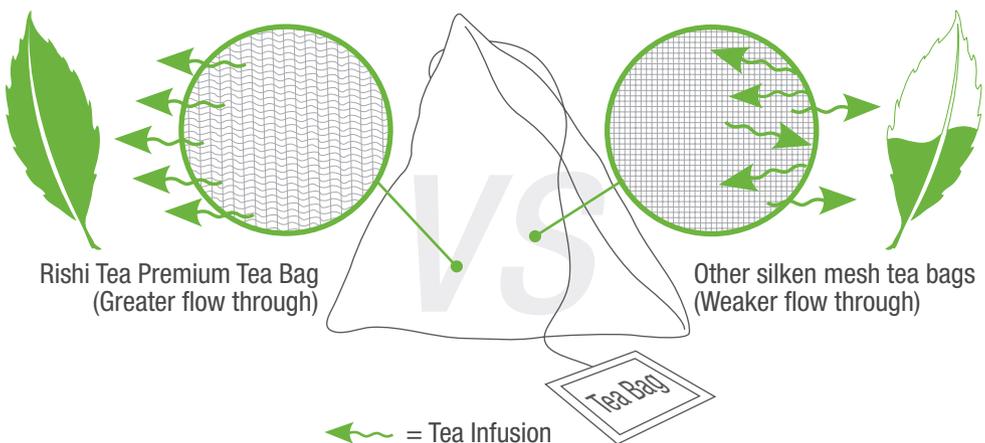

The logo for Rishi Tea, featuring the word "rishi" in a white, lowercase, sans-serif font above the word "tea" in a smaller, lowercase, sans-serif font, both set against a green rectangular background.A close-up photograph of several tea bags steeping in a glass teapot. The tea is a golden-brown color, and the teapot has condensation on its surface. The tea bags have green labels with the "rishi tea" logo.

Rishi Tea offers the highest quality Organic and Fair Trade Certified™ teas and herbs, fresh each season and direct from tea gardens around the world. Now, we're excited to introduce tea lovers to the fullest flavors, richest aromas, and boldest infusion colors they've ever experienced in a tea bag format. Inspired by the filtration of one of our favorite teapots from Japan, we designed a new tea bag for a greater rate of infusion flow through and tea quality that matches Rishi Tea's loose leaf tea experience.

This Is Not Just Another Mesh Tea Bag

Rishi Tea's next-generation Premium Tea Bags are carefully designed with a new, looser knit pattern that allows more of tea's aroma and character to flow into the cup. Other mesh tea bags are woven too tightly, restricting the infusion and locking flavors inside the bag. We're finally able to reach more tea drinkers with tea bags that not only offer convenience, but that are also able to deliver the full flavors of our high quality loose leaf teas.

—INFUSION FLOW THROUGH COMPARISON—

15-Count Tea Bag Dispenser Boxes

Our 10 tea bag varieties are offered in multiple formats. Our Dispenser Boxes seen here are made from 100% recycled post-consumer waste paper, processed chlorine free and printed with soy ink.
